You'll find them right here in our **'Frequently Asked Questions'** section.

↳ p. 68

# Beautiful moments.

Enjoy many beautiful moments with a floor that'll bring you a **step closer to nature**.

## Genuine wood looks

Lose yourself in the details of our wonderfully **matt and lifelike wood decors** – they're practically indistinguishable from real parquet. Each wood type and shade was **selected and designed by our experts with the utmost care**, choosing only the most authentic looks. Our team even took it a step further and constructed several designs from exclusive high-definition scans of actual pieces of wood. How cool is that?

## Natural knots and cracks

Our laminate experts have put a lot of research into matching the right structure with the distinct characteristics of each wood type. From **soft and subtle wood structures** for our pine designs to a unique, **real wood structure** for our exceptional oak designs; every single knot or crack is outlined for a highly realistic effect.

Mix & match:

## Planks of all shapes and sizes

Choose a plank size that suits your wants and needs. Go for a wow-effect and create a **fabulous herringbone** pattern with our uniquely-sized small and narrow planks. Or open up a space using **extra-large planks** instead. And what about **standard-sized planks**? After all, classic never goes out of style. Plus, a select amount of the same colours are available in these different plank sizes, so that you can **mix and match floors** in different rooms for a unique, yet uniform look.

Beauty comes in many forms.

## Colours inspired by nature

Colour is one of the most essential elements for a beautiful interior. With our floors, you'll be able to explore a **broad palette of colours** for all tastes, ranging from light to dark with all shades of beige, brown, and grey in between – all made with nature in mind. Looking to **create harmony in your home**? You'll not only find that perfect shade here, but also discover which colours match it best along the way.

Want to know **which colours work together**?  
Learn more on p. 12.

# Carefree moments.

Real life doesn't always go according to plan. Luckily, **your laminate floor is one less thing to worry about.**

## 100% water resistant

Had a clumsy moment? No worries. The surface of our laminate planks are unable to absorb any liquid, making them fully splash resistant. Combined with our **hydro+ water-repellent coating** that further protects the edges of the planks, a compact locking system, and specialised hydro+ accessories used around the perimeter of the room, you've got yourself a **100% water-resistant floor that can withstand all kinds of spills.** That's right! You can choose the level of water resistance, making your floor perfectly adaptable to any room.

## Scratch resistant

Not sure how your new floor will fare with pets in the house? We can already tell you now: it'll do just fine! Our laminate floors are highly **scratch resistant** thanks to our **premium-quality materials**, so those paws and claws can do no harm.

## Fade and stain-free

What about other long-term effects? We'll let you in on a secret: **our floors can withstand spills from everyday products** such as food and make-up, so you're all set in that area too. Plus, our floors are **fully UV resistant**, so they won't fade over time. So open up those curtains and let the sun shine through!

## Easy to install

Planning to tackle the installation yourself? With the right tools and the instructions available (you'll find them in the packaging or on our website and YouTube channel), you're fully prepared for a **quick and easy installation.** Simply slot the planks into place with the help of our snap-in-place locking system, and you'll be ready in no time.

## Easy to maintain

All those splashes and spills are easily wiped away to leave a sparklingly clean surface. For regular maintenance, use a soft brush, vacuum cleaner, or microfibre mop along with our biodegradable **laminate cleaner.**

## Ideal for underfloor heating and cooling

Keep your toes toasty on our laminate floors! They're perfectly **compatible with underfloor heating and cooling**, an energy-efficient system to keep your house at an ideal temperature. You'll find a dedicated manual with more information on our website.

# Quality moments.

Spend quality time on a floor that's produced with only the **highest standards** in mind.

## Made to last a lifetime

A home makeover requires a considerable investment, so make sure you get your money's worth by using **quality flooring**. And that's something you can find at BerryAlloc: our laminate is made from the best materials and rigorously tested for strength, water and splash resistance, impact damage, fading and discolouration, as well as stability and wear. So let our floors become the solid foundation to live your life to the fullest, as we wholeheartedly **guarantee** they're made to last a **lifetime** in your home.

## Premium quality floors

You're looking for a floor that'll suit your lifestyle. Whether it's private and peaceful, or bold and boisterous, our laminate floors are more than ready to take on the challenge. The use of **superior materials** and a **solid locking system** creates a floor that's **made to last**, with high levels of abrasion and scratch resistance. These premium quality floors are more than prepared to help withstand life's trials and tribulations.

## Floors made to relax.

## Made in Belgium

Our laminate floors hold the 'made in Belgium' label – something we're very proud of. The **entire creation process** from concept and design to manufacturing, testing, and packaging takes place in our plant in Menen, Belgium, under the careful eye of our dedicated flooring experts.

made in  Belgium

## Responsible floors

Our floors are not only made with your comfort in mind, but also with great respect to the environment. At BerryAlloc, we strive to use as little waste as possible. Our laminate floors are manufactured in Belgium to reduce the carbon footprint. Our laminate is **PEFC-certified** (Programme for the Endorsement of Forest Certification), supporting the promotion of Sustainable Forest Management. And with an extremely **low VOC** (Volatile Organic Compound) **emission**, our floors are safe and healthy to install in your home.

# Spice up your life with some colour.

Did you know that certain colours can influence your mood and productivity? A **well-balanced colour scheme** will not only **elevate the look and feel of any interior**, but can also contribute to your **general well-being**. And the shade you pick for your floor can make a huge difference.

harmony lab.

TIP

The **colour character works in both ways**: if you've already decided on a floor, you can use it to determine the **colour of your walls**. Already got a specific colour scheme in mind? **Choose your floor** based on that.

Connect 8 V4 Epic Brown ●●

## Choosing the right colours for your home

But how do you know which colours work best? BerryAlloc's **Harmony Lab** will guide you to a flooring choice that is complementary to what you choose to implement in your interior. This **tool** has **analysed different colours together with the undertones of our floors** in countless ways, providing a highly accurate method to determine the most **compatible combinations**. Here are some basic explanations and ground rules that you can easily implement to create a well-balanced interior.

Colour me beautiful.

## Colour character

Although the colour of your floor may seem fairly obvious at first sight, there's a whole layer of subtle undertones that'll determine which colours work best with that particular floor – something that is especially apparent in natural wood designs. This **underlying shade** is the **colour character of your floor**.

These are the resulting colour groups:

- yellow
- orange
- red
- purple
- blue
- green

↳ We've determined the **colour character** for **every single decor** in this brochure, which you'll find on p. 50-57.

Once you know the colour character of your floor, you're able to take the next step in your interior design journey. This **chromatic colour wheel** will guide you in your decisions.

Turn the page to see how it works!

## Contrasting colours

Using contrasting colours means using colours that are **directly opposite** to your floor's colour character on the chromatic colour wheel.

If your floor has a **yellow** character, offset it with **purple** elements in your interior, or vice versa. The same goes for **orange** and **blue**, or **red** and **green**.

## Harmonious colours

Using harmonious colours means using colours that are either **the same colour** as your floor's colour character; or its **neighbouring colour** on the colour wheel.

If your floor has a **yellow** character, this means using variations of **yellow, green, and orange** in your interior. If it has a **blue** character, this means using variations of **blue, green, and purple**, and so on.

Are you having difficulty imagining your new laminate floor in your own home? **Floorfit** has got you covered. This **digital tool** simulates your top picks in a room of your choice. Take a moment to try out your favourite choices and figure out what suits your style best!

# Turn imagination into reality.

What are you waiting for?  
**Floorfit it out!**

Choose colours that make you happy.

Connect 8 V4 Crush Brown Natural

# Choose your favourite colour.

Choosing your new floor doesn't always have to be practical. It has to be pretty too! **Colour is one of the most important decisions** when buying a floor. But how to get to that perfect shade?

**Find inspiration** in a **broad range of natural colours** and discover which shades and styles blend together best to create the interior you've always dreamt of.

## MIX & MATCH

- Want the **same floor colour throughout your home**? We've got a select amount of decors available for **different plank sizes and attributes**, so you can **mix and match styles and finishes** from room to room!

*Get inspired*

# Whites.

A white floor is the **ultimate blank canvas** to build your interior on. It'll suit any aesthetic or interior style, and brings an **airy, minimalistic vibe** to the room. Want a bold print or daring colours for your walls? You'll never go overboard with your look if you've got white planks to counter-balance it.

Ocean 8 V4 Retro Chic Blue Grey ●

Chateau Chestnut White ●

↳ Make your white floor **more playful** with our **Retro Chic Blue Grey** decor that mimics **Portuguese tiling**.

Lovely,  
light colours.

## TIP

A **smaller room** or a room with **limited natural light** will work best with a **white or lighter floor**.

Connect 8 V4 Chestnut White ●

You'll find more details on our **white floors** on p. 50.

# Greys.

Looking for the **perfect neutral shade**? A grey floor is an **ideal base for a bolder interior**: it's light enough to brighten up a room and dark enough to hide dust and other imperfections. Its reserved, yet elegant character will divert the spotlight towards other decorative elements, making it the ultimate sidekick to **make the rest of your interior shine**.

Ocean 8 XL Bloom Silver Grey ●

**Beautifully  
balanced.**

Ocean 8 PA Jazz Light Grey ●

## TIP

Furniture with a more **understated style** will stand out best in a grey interior.

Chateau Java Light Grey ●

A full overview of our **grey floors** is available on p. 51.

# Light naturals.

Ocean 8 V4 Select Light Sand ●

Connect 8 V4 Bloom Sand Natural ●

Connect 8 Bloom Sand Natural ●

## Classic and gorgeous.

Connect 8 V4 Gyant Light Sand ●

Another alternative to a more neutral floor is a light natural shade. This **range of beige and sand hues** combines the best of both worlds if you want a lighter floor to brighten up your space, yet still retain that wonderfully natural wood look. Create a **peaceful and pure atmosphere** with these beloved, timeless options.

### TIP

Light natural floors also work well with a **minimalist aesthetic**. Choose a floor without bevels to enhance that **clean, uniform style**.

Want to see more **light natural options**? Check them out on p. 52.

Connect 8 V4 Ragnar Warm Natural ●

# Naturals.

A floor with natural shades remains a true **classic**. The honey and copper-infused tones are ideal for highlighting the wood grain, giving you a **look that's closest to nature**. These floors will bring a cheerful, sunny energy to your room while still creating the illusion of more space.

Ocean 8 V4 Epic Natural ●

## TIP

Choose a natural floor with **extra knots and cracks** to create a **more rustic setting**.

## Warm, cosy moments.

Ocean 12 XL Gyant XL Warm Natural ●

Discover the full range of our **natural floors** on p. 54.

Want a softer colour that's slightly darker in shade? The **soothing, earthy tones** of these light brown floors absorb more light, making a colder space instantly seem warmer and cosier. Turn your room into a **comfortable little cocoon** with these **muted hues** and enjoy a more informal, homey style that works so well with these colours.

# Light browns.

Chateau Walnut Brown

Picked your perfect shade? That's great! The next step is determine **which plank size you prefer** and **which extra features your floor requires**, depending on the installation area. Find out what features work best for your installation.

# Find the floor for your lifestyle.

1

## I need a water-resistant floor.

Your best choice for a room where you're **more likely to encounter liquids and spills**, such as bathrooms or entry hallways.

- Find out more about our **water-resistant technology**: p. 36

2

## Looking for a herringbone floor?

Our classy and sassy **herringbone laminate** is sure to be an eye-catcher in every room.

- Find out more about our **available plank sizes**: p. 38

## LOOKING FOR EXTRA-LARGE PLANKS?

Sometimes longer planks just look better in a certain space! Find out which planks you can **supersize** – and which ones are water-resistant on top of that.

- Find out more about our **available plank sizes**: p. 38

3

## I need a splash-resistant floor.

If you're looking for a no-fuss floor for a room with reduced foot traffic, you're best off with our standard **splash-resistant laminate**.

- Find out more about the **difference between splash and water resistant floors**: p. 36

4

## I need this renovation to happen quickly.

Got a time-sensitive installation planned? Our Ocean 8 PA collection with **attached pad** will save you a fair amount of time since you won't need to install an extra underlay.

- Find out more about our **integrated underlay**: p. 39

5

## I need a floor for my business.

You'll need a floor that's suited to more **intensive foot traffic**. Our 12 mm floors are great in a public setting, thanks to their higher abrasion class and commercial warranty.

- Find out more about our **commercial solutions**: p. 40

# Looking for a 100% water-resistant floor?

Ocean 8 PA Jazz Light Grey ●

A laminate floor is unable to absorb any liquid on its surface, making it thoroughly **splash resistant**. But what if you're looking for something more resilient for your kitchen, bathroom, laundry room, or entry hallway?

That's where our innovative **hydro+ technology** comes into play. This water-repellent coating further protects your floor around the edges of each plank. As a result, you'll have a **100% water-resistant floor**, able to withstand all kinds of liquids.

## Splash resistant

If you're planning to install your floor in a room that doesn't come across a lot of liquids, this is your perfect choice.

- ↳ Looking for a **splash-resistant floor**? Check out our **Connect** (p. 46) and **Chateau** (p. 48) collections.

## 100% water resistant

This is the ideal flooring solution for rooms where you're more likely to **encounter liquids and spills**. Our hydro+ technology will guarantee a **100% water-resistant floor**.

- ↳ Looking for a **water-resistant floor**? Check out our **Ocean+** collection (p. 44).

100% WATER-REPELLENT COATING

Ocean 8 PA Jazz Light Grey ●

## DISCOVER OUR PIONEERING HYDRO+ TECHNOLOGY

Back in 2008, BerryAlloc was the first company to introduce water-resistant laminate to the market with its innovative hydro+ technology. This **unique formulation** has indisputably proven its durability, quality, and value for money after years of exposure to daily situations.

### How does it work?

A **hydrophobic coating** is applied to all sides of the plank, effectively repelling water when it comes into contact with the joints. Applied during manufacturing, the Ocean+ collection is completely water resistant when it leaves the production line.

- ↳ Curious to see it in action? **Watch the video!**

- ↳ Remember to use your **hydro+ accessories** when installing your floor for a fully water-resistant finish! You'll find them on p. 63.

# Planks of all shapes and sizes.

## Want an attached underlay?

That's right! Our **Ocean 8 PA collection** comes with an attached pad that serves as an integrated underlay. No need to worry about choosing and using a separate underlay, which'll make your installation **so much easier**. Plus, the sound-absorbing qualities of the attached pad **help reduce noise**, and it's also extra-comfy to walk on. Win-win!

Discover our **Ocean 8 PA collection:**  
p. 44

## What about bevelled edges?

We've got planks with **no bevels** available in our **Connect 8 collection**, while **all our other laminate collections** have planks with all **four bevels**. But what's the effect on your interior? Planks without bevels **will make your room look bigger**, thanks to their smooth, minimalistic look. But if you prefer a more **natural look**, you're better off choosing **fully bevelled** edges for a gorgeous plank effect.

Discover our **Connect 8 collection:**  
p. 46

# Need a floor for a commercial space?

Are you looking for a durable floor to install in a commercial space? Offices, restaurants, hotels, healthcare, shops... These beautiful wood looks will brighten up any room. Plus, our laminate floors are made to be tough, with high levels of abrasion and scratch resistance.

## Extra tough

Our **Ocean 12 V4** and **Ocean 12 XL** collections are 12-mm thick and belong to a level 33 abrasion class. Their higher impact and wear resistance gives them a ten-year warranty for a commercial use, making them perfectly suitable for a business setting.

↳ Find out more about **Ocean 12 V4** and **Ocean 12 XL** here: p. 45

## Our sustainability certifications

Our laminate floors carry a number of sustainability certifications. Discover them below.

### BREEAM INTERNATIONAL

Our laminate floors contribute by earning up to 17 BREEAM credits in five different categories.

### LEED

Our laminate floors contribute by earning up to 14 LEED points in three different categories.

### Indoor Air Quality A+

Our Chateau collection holds an A level for Indoor Air Quality, and our Connect and Ocean+ laminate ranges an A+ level, producing the lowest possible VOC (volatile organic compounds) amounts and ensuring that all indoor air quality standards are met in full).

## DID YOU KNOW?

↳ BerryAlloc is a pioneer in **water-resistant laminate flooring**, being the first to introduce the water-repellent technology to the market back in **2008**.

100% water resistant

100% water-repellent coating

10 years commercial warranty

premium quality

natural wood design

scratch resistant

easy installation

easy maintenance

### PEFC

All our wood is sourced from sustainably managed forests (PEFC Certified) that meet the strictest environmental, social, and economic requirements.

### Environmental Product Declaration (EPD)

We have an EPD available for our laminate products in accordance with ISO 14025 and EN 15804+A2.

### Fiche de Déclaration Environnementale et Sanitaire (FDES)

We have an FDES available for our laminate products in accordance to NF EN ISO 14025 and NF EN 15804+A1.

### Other certifications

CE, REACH, ISO 9001 (quality management), fire resistance class Cfl-s1, phthalate-free.

# Discover the collections.

## / ocean+.

Need a floor for a room where you're more likely to encounter water? Enjoy a **100% water-resistant** Ocean+ laminate floor throughout your home thanks to our **pioneering hydro+ technology**. This option is available for **all 50 designs** in standard plank size, but also for a selection of planks with integrated underlay, XL planks, or thicker 12-mm floors.

## / connect.

The **splash-resistant** Connect floors are the perfect all-rounders to elevate your interior. **All 50 designs** are available in a standard plank size or an XL-plank size option for a select few. You can also choose between subtle minimalism in a floor with no bevels or a beautiful plank effect with fully bevelled edges.

## / chateau.

The **15 natural wood designs** and **uniquely small and narrow planks** of our Chateau collection are perfect for recreating the beloved parquet **herringbone** style that's lasted centuries. This sophisticated look will add depth to any room, giving a guaranteed wow effect.

### MIX & MATCH

Keep in mind that **a select amount of decors are available throughout the different collections** if you wish to mix and match styles and finishes across different rooms!

# Don't forget the lovely details.

Connect 8 V4 Bloom Light Brown ●

# Install.

Yay! You've just picked out your new floor. **What's next?** Now's the moment to determine **which products** you need in your installation and decoration journey. These will help your floor achieve that wow-factor and provide you with optimal living comfort. Not sure about what you need? We'll help you with every step of the way.

## Underlays

**Start by selecting a suitable underlay.**

A high-quality underlay can prevent creaking and reduces the sound of your steps in the room and the floor below. It's an essential item to keep your floor in great shape and will significantly improve your living comfort once installed.

The **best all-rounder** and required for our **herringbone laminate collection**.

**Excellence Plus**  
10 m<sup>2</sup> – 2,5 mm

**Excellence Impact+**  
12 m<sup>2</sup> – 3 mm

**Excellence Go**  
15 m<sup>2</sup> – 2 mm

<b>Corrects irregularities and protects locking system</b>	✓	✓	✓
<b>Impact sound</b> The sound that gets carried to the room below	-21 dB	-19 dB	-19 dB
<b>Reduces walking sound</b> The sound of your footsteps in the room	●●●●	●●●○	●●○○
<b>High impact resistance</b>	●●○○	●●●●	●●●○
<b>Suitable for underfloor heating/cooling</b>	●●●●	●●○○	●●○○

All our underlays have been tested and approved for all BerryAlloc laminate collections – with the exception of our herringbone laminate collection, which should always be installed alongside Excellence Plus. They provide:

- A **flat base** to help correct small irregularities. This will support the necessary expansion behaviour while guaranteeing perfect performance.
- A combination of great **acoustic absorption** and **low thermal resistance**.
- An **integrated moisture barrier** to protect against rising damp.

## DID YOU CHOOSE TO INSTALL OCEAN+ 8 PA?

Then you can **skip this step**, because your underlay is already integrated in the attached pad! Keep in mind that you'll still need to install a **moisture barrier** underneath your floor.

## Tapping block

Use our tapping block to easily click planks using the DuoLoc system into place.

Ocean 8 V4 Epic Natural

## Hydro+ kits for Ocean+

To fully protect your Ocean+ floor around the edges of the room, you'll need **the right accessories for a 100% water-resistant installation**. Our hydro+ kits make sure your floor is able to expand and remain water resistant at the same time.

### Fillertwine

Use the Fillertwine joint sealing strip as a base for sealant. Fill in all expansion gaps with Fillertwine to make sure your floor can still shrink and expand, without exposing it to water.

10 m / Ø 8mm

### Hydro+ sealant

This specially developed sealant should be used on top of the Fillertwine in expansion points at perimeters, under doorways and around pipes. The hydro+ sealant protects the edges of your floor from coming into contact with humidity.

310 ml

## A QUICK AND EASY INSTALLATION

Our laminate floors are easy to install and require few special tools. There are **three different locking systems available**:

- **DuoLoc** for our standard planks
- **PentaLoc** for our XL planks
- **ChateauLoc** for our herringbone planks

You'll find detailed installation instructions available in the packaging and on our website. Make sure to read the instructions beforehand and closely follow each step during installation.

Check out our **installation videos** on **YouTube!**

# Finish.

## Profiles

Remember to think about using the right profiles so your floor can smoothly transition from one room to another, all while respecting the necessary expansion behaviour. There are different profiles for different requirements, all available in **matching colours** to your floor or in a modern **aluminium**. Discover which ones work for you.

### Matching T-Profile

To connect two floors of the same height.  
2400 x 40 x 8 mm  
(L x W x H)

### Matching reducer profile

To connect two floors with different heights.  
2400 x 45 x 12 mm  
(L x W x H)

### Matching end profile

To finish your floor along a wall or a window.  
2400 x 28 x 8 mm  
(L x W x H)

*Match your floor*

**TIP**

**Matching skirtings** will make your **floor seem larger** whereas **paintable skirtings** will make your **walls seem longer**.

*Match your wall*

## Skirtings

Time to think about that finishing touch. Our skirtings create a neat and tidy transition between wall and floor. Do you want **matching skirtings**, fully in line with your new floor? Or **white, paintable** skirtings to take you in any decoration direction? Your choice!

### Matching skirting

Installation: glue or clips  
2400 x 12 x 60/80 mm  
(L x W x H)

### White skirting

Installation: glue or clips  
2400 x 12 x 60/80 mm  
2400 x 14 x 100/110 mm  
2400 x 26 x 110 mm  
(L x W x H)

### Matching quarter round

Installation: glue  
2400 x 14 x 14 mm  
(L x W x H)

### White quarter round

Installation: glue  
2400 x 14 x 14 mm  
(L x W x H)

## WHAT ABOUT INSTALLATION?

There are **two ways to attach** your **skirting board** to the wall.

**Glue it**  
Use our **BerryAlloc glue**.

**Fix it**  
Use **clips\*** and **plugs**.

(\* Only for 60 and 80 mm)

# Maintain.

Make those moments of joy on your new floor last longer by regularly using our specially developed **BerryAlloc laminate cleaner**. It's suitable for first-time maintenance as well as regular use and will provide extra protection for your floor. Plus, it's **biodegradable** and has a pleasant fragrance. All it requires is one capful to a bucket of water.

**BerryAlloc**  
laminate cleaner

1 litre

**Chores don't  
have to be  
a bore.**

Ocean 8 V4 Ragnar Light Sand ●

There are a lot of things to think about when choosing and planning to install a new floor. And maybe you've still got some questions left unanswered. We've listed the most frequently asked ones here.

# Questions? We've got answers.

## Choosing your floor.

### What is a laminate floor made of?

- A laminate floor consists of:
1. An **overlay** that determines the strength and resistance of your floor
  2. A **decor paper** for the design
  3. A **high-density fibreboard (HDF) core**
  4. A **counterbalance** to stabilise and protect the HDF core
  5. The **hydro+** water-repellent coating\*

(\* Only available for our Ocean+ collections

## WHY WOULD I CHOOSE A LAMINATE FLOOR?

With so many different flooring choices available, it can be a struggle to figure out which floor suits your lifestyle best. Why laminate then? This type of floor brings you many advantages. It's an **affordable** and **easy-maintenance** alternative for other hardwood flooring options – with equally **beautiful wood looks** and the added bonus of being extremely **scratch resistant**. And these good looks won't fade, since laminate floors are completely **UV resistant**. It's also 100% water resistant, giving you the opportunity to recreate a wonderfully natural theme throughout your entire home. Plus, DIYers will be happy to hear that the **installation is simple** and straightforward. A stress-free solution for a happy home!

### Where can I buy a BerryAlloc floor?

You'll find an overview of certified **BerryAlloc dealers** in your local area on our **website**.

Find your BerryAlloc dealer!

## In which rooms can I install a laminate floor?

We've got floors for all kinds of rooms! The **wear class**, which you'll find on the packaging and in the technical guide, indicates the **durability of your floor** and the **areas for which it's best suited**. This classification always combines residential and commercial use together (ex: 23/32). All our laminate floors for **residential use** are **class 23**, which means they are suitable for all areas inside your home: bedrooms, home offices, bathrooms, living rooms, dining rooms, (entry) hallways, and kitchens... you name it!

As for **commercial use**, our laminate floors fall into two classes. Our Ocean 12 V4 and Ocean 12 XL are categorised as **class 33** and are suitable for **heavy commercial use**, for areas such as large offices, shopping malls, and classrooms. All our other collections are **class 32** and are suitable for **general commercial use**. They can be installed in areas such as waiting areas, hotel lobbies and rooms, stores, conference rooms, and offices.

**TIP**

Need a water-resistant floor for a specific room? Our **Ocean+ collection** is **100% water-resistant** with the right hydro+ accessories.

## Planning your installation.

**TIP**

**Calculate** at least **10% extra surface area** when ordering your new floor to account for waste and cutting loss during installation.

### At what point should I install my floor when renovating or building?

The installation of your floor should be one of the **very last steps** during your renovation or building project. Doing so will help **avoid unnecessary damage** to your floor while carrying out other tasks.

### Can I install my new laminate floor on top of my old existing one?

This depends on the floor that's already present. It **cannot** be installed on top of a carpeted floor, as this is too soft and can cause damage to the locking system. It **can** be installed on top of a tiled floor, a hard vinyl floor, or a wooden floor, but **only** if this floor is completely **level and flat**. However, using an underlay will help level out minimal height differences and can help reduce noise.

Not sure what to do? It's always better to remove your old floor and create a new, flat base. The quality of your subfloor plays a very important role in the overall installation result.

### Can I install laminate on top of underfloor heating/cooling?

Yes, you can! Both **waterborne** and **electrical systems** are compatible with a laminate floor. You'll find a **detailed installation manual** for underfloor heating/cooling on the support page of our website.

Scan the QR code to read the manual.

### Should I install my floor and skirting boards before or after painting my walls?

We advise you to **paint your walls before installing your floor and skirtings**. But if this isn't feasible, make sure to cover your floor with a protective surface. You wouldn't want accidental paint spills on your brand new floor!

*In which direction should I lay my planks?*

There are a few things to consider when deciding on the direction of your planks.

1. Your floor usually looks best when it **follows the direction of natural lighting**. Place your planks so that they are vertical to the largest window or light source in your room.
2. If you're installing the same floor across multiple rooms, consider what direction looks best for both rooms to create a smooth transition.
3. If you're installing in a long, narrow room, lay your planks horizontally to make it seem wider. Got a smaller room? It'll seem longer with vertically laid planks.

### Why should I install skirtings?

Skirtings help conceal the required expansion gap around the edges of your floor, hiding the base of your wall. It adds sophistication and tidiness to your final result.

## Installing your floor.

### WHAT STEPS SHOULD I FOLLOW WHEN INSTALLING MY NEW FLOOR?

Once you've acquired your new BerryAlloc floor, the following steps will help you achieve a successful installation:

#### Prior to installation

- Carefully read the installation instructions prior to installation
- Let your floor acclimatise to the room for at least 48 hours before starting installation
- Check if your subfloor is dry, level, and clean
- Place the right underlay (for a floating installation and only for collections without attached pad)

#### During installation

- Your floor should be installed at a room temperature of 18-25°C and a relative humidity of 40-60%
- Install your floor according to the installation instructions
- Use our hydro+ kit for a 100% water-resistant installation when placing an Ocean+ laminate floor
- Install the profiles

#### After installation

- Install the skirtings
- Use our Laminate Cleaner to clean your new floor to remove all traces of dust and debris from the installation

### Why does my floor first need to acclimatise to the room before installation?

As mentioned, a laminate floor **will expand or shrink** depending on room climate conditions. Temperature and humidity can differ between the storage place and installation area. If the planks are installed immediately upon arrival, they still need to adapt to the room. The expansion or shrinking that follows can cause **an uneven floor that can damage the locking system**. Avoid these issues by giving the planks **a suitable amount of time (at least 48 hours) to acclimatise to the room**. They will have performed the necessary expansion behaviour by then, with a successful installation as a result.

Ocean 12 XL Jazz XL Sand Natural ●

## WHY DO I NEED TO USE AN UNDERLAY?

An underlay is a vital part of your installation and can **greatly improve the success of your installation**.

A suitable laminate underlay provides the following elements:

- **A steady base** by levelling out minor irregularities in the subfloor. This protects the locking system and helps prevent creaking
- **Reduces walking sound** and **sound transmission** to a lower-level room
- **Extra protection** against daily wear and tear (walking, falling objects, furniture...)
- Includes a **moisture barrier** to protect your floor from seasonal humidity changes in your subfloor

Always make sure to use an underlay that is **suitable for laminate flooring**. We strongly advise you to use a BerryAlloc underlay, as these are manufactured to best support our floors.

Keep in mind that you do not need to use an underlay when installing our Ocean 8 PA floors, as this collection already includes an integrated underlay.

↳ Go to p. 60 to see all our available laminate underlays.

## Why should I install laminate as a floating floor?

Laminate consists of at least 80% organic wood materials. This means it expands and shrinks depending on **room climate conditions**. A 'floating' installation is not attached to the subfloor (not glued) and allows the floor to move according to the necessary expansion behaviour. To allow this behaviour, you'll need to leave an **expansion gap of at least 8 – 10 mm** between your floor and all fixed constructions during installation. This is also the reason why you **cannot install a laminate floor underneath fixed constructions**, such as kitchen cabinets or built-in closets.

**TIP**

When installing your floor, **use flooring spacers** to make sure you're maintaining the correct distance for an expansion gap.

## How do I install a laminate floor?

The installation method depends on the locking system and the laying pattern (e.g. herringbone). You'll find a **step-by-step manual available for all laminate locking systems** on the support page of our website. Our installation videos are also available on our YouTube channel.

Watch the installation video

**TIP**

Remember to **carefully read or watch all steps** before starting your installation.

Chateau Gyant Dark Brown ●

## HOW SHOULD I INSTALL MY CHATEAU FLOOR: FLOATING OR GLUED?

Chateau can be installed as a floating floor, or can be fully glued to the subfloor, depending on the floor pattern. However, we strongly **recommend applying a fast-drying wood glue** to both short sides of the planks for optimal floor stability. Make sure to thoroughly read the installation manual before installing your floor, which you can download on our website.

## Maintaining your floor.

### How do I maintain my new BerryAlloc floor?

Keep your floor looking brand new with these simple tips and tricks:

- Place a **doormat** at the entrance of your home to avoid bringing in dirt or moisture
- Add **felt pads** to your chair and table legs
- Use a **clear plastic mat** for under your office chair
- **Clean** any spilled liquids as soon as possible

You'll find our Care & Maintenance manual on our website, and more information on our BerryAlloc Laminate Cleaner on p. 66.

Download our Care & Maintenance manual here.

DECOR NAME(S)

--	--	--

COLLECTION(S)

/ **ocean+.**

/ **connect.**

/ **chateau.**

REFERENCE NUMBER(S)

You'll find the reference number on p. 74-77

--	--	--

THESE ARE MY ROOM MEASUREMENTS

length x width (metres)

x	=	m <sup>2</sup>
x	=	m <sup>2</sup>

SQUARE METRES OF FLOORING REQUIRED

See tip p. 69

--	--	--

I'LL NEED THESE ACCESSORIES FOR A SUCCESSFUL INSTALLATION

underlay

tapping block

hydro+ kit

profiles

skirtings

laminate cleaner

We'd love to see your new floor!
